

Coronary Bifurcation Summit 2012

5th Left Main & Coronary Bifurcation Summit

7-9th December 2012
Nanjing, China

Dear Doctor,

The **Left Main & Coronary Bifurcation Summit (CBS)** was founded in 2007 as a think tank **dedicated to the treatment of left main and coronary bifurcation lesions**. For **CBS 2012 on December 7-9 in Nanjing, China**, the meeting scale is still thought to be kept in a reasonable range, although audience was around **700** in last year. **CBS** aims to improve patients' care by freshly fundamental researches, clinical trials, consortium or guidelines published yearly, emerged ideas and dedicated case-based discussion. Considering the very busy schedule, **CBS-in-Box** will be a brand new as a dedicated subunit in this year's CBS.

With your outstanding contribution to the interventional cardiology, it is my honour to invite you to participate **CBS 2012**. Currently, we are building programme for CBS 2012. Your interests are very important for all interventionalists. Younger generation has been testing your techniques, ideas and recommendation in every day practice. Surely, most patients would benefit from all of your experiences.

CBS2012 will focus on the following sessions:

- Reflecting the change from-intention-to-treatment
- FFR ,IVUS and OCT imaging tools in guiding stenting techniques
- SB lost after stenting MB.
- Distal left main bifurcation stenting
- Novel clinical trial, Complications

I am looking forward to welcoming you in Nanjing!

Best regards

Professor Shao-Liang Chen
Executive Chairman

CBS Organizing Committee
Nanjing First Hospital Nanjing Heart Center
No.68 Changle Road, Nanjing 210006, China.
