

Dear Professor,

The **11th Left Main & Coronary Bifurcation Summit (CBS 2019)** will be held during **November 28th to December 1st in International Conference Hotel Nanjing, China.** CBS aims to improve patients' health with the latest fundamental researches, clinical trials, yearly published guidelines, new ideas, live demonstration and dedicated case-based discussion.

It is my great honor to invite you to participate in CBS 2019. Your expertise on the advanced techniques and clinical investigation are very important to all the participants of the meeting.

CBS 2019 will mainly focus on the following subjects.

- Definition and therapeutic strategy of complex bifurcation lesion
- Utilization of DK crush for the complex bifurcation
- Utilization and significance of intra-coronary imaging techniques
- Evidences from bench models to treatment decision
- Principle and significance of fluid hemodynamics
- Pulmonary arterial denervation for pulmonary hypertension
- Dual antiplatelet therapy strategy
- Stenting techniques with circulatory support systems

We thank you for your attention and look forward to welcoming you to Nanjing!

Best regards

Shao-Liang Chen
Executive Chairman, CBS Organizing Committee
